Technical Skills

- **Programming Languages:** Java, JavaScript
- **Frontend:** React.js, HTML5, CSS3
- **Backend:** Spring Boot, Spring Security, Node.js, Express.js, REST APIs, JWT Authentication
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Developer Tools:** Git, GitHub, Postman, VS Code, ChatGPT, Claude, Google Antigravity
- **Core Concepts:** Data Structures and Algorithms, Object-Oriented Programming (OOP), SDLC, Agile Methodology

Professional Experience

Tanvox Technologies Pvt. Ltd. Hyderabad, India
Full Stack Developer Intern Aug 2026 – Present

- Developing scalable backend modules for the TaxEdge application using **Java, Spring Boot, and Spring Data JPA**, following layered architecture and REST API development practices.
- Building and integrating **RESTful APIs** for multiple loan modules, including **Personal Loan, Vehicle Loan, Home Loan, and Business Loan**, with database operations and business logic implementation.
- Implementing secure user authentication and authorization using **Spring Security and JWT (JSON Web Token)**, including token validation and protected API endpoints.
- Integrating **Firebase Cloud Messaging (FCM)** to deliver push notifications for customer application updates and important status changes.
- Working with **Hibernate, PostgreSQL, DTOs, JPA Entities, Repositories, and Service Layers** to implement database operations and maintain backend application functionality.

Projects

Zerodha Trading Platform (Full Stack Application) Aug 2025
React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack trading platform inspired by Zerodha using the **MERN Stack (MongoDB, Express.js, React.js, and Node.js)** with responsive user interfaces.
- Implemented secure **JWT-based Authentication and Authorization**, including login, registration, middleware validation, and protected REST API endpoints.
- Developed interactive dashboard modules for **Orders, Holdings, Positions, and Funds Management** to organize and display trading-related information.
- Created reusable **React.js Components**, implemented application routing, and integrated frontend interfaces with backend **REST APIs**.

Online Voting System (MERN Stack) May 2026
MongoDB, Express.js, React.js, Node.js, JWT

- Developed a full-stack **Online Voting System** using the MERN stack, enabling users to securely participate in polls and manage voting activities.
- Designed and developed **RESTful APIs** using Node.js and Express.js, with MongoDB schemas for user accounts, poll management, and voting data.
- Implemented secure **JWT Authentication and Authorization** with protected routes to manage user access and voting operations.
- Developed poll creation and voting functionalities with automatic **Vote Counting and Percentage Calculation** to display voting results.

Education

Sathyabama Institute of Science and Technology, Chennai 2021 – 2025
B.E. - Computer Science and Engineering *CGPA: 7.5*
